

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

Claim 1 (Currently amended): A composition comprising:

- a) a fluorochemical compound selected from the group consisting of a fluorochemical acrylate polymer, a fluorochemical urethane and an alkylated fluorochemical oligomeric, said fluorochemical oligomeric compound comprising:
 - i) a fluorochemical oligomeric portion comprising an aliphatic backbone with a plurality of fluoroaliphatic groups attached thereto, each fluoroaliphatic group having a fully fluorinated terminal group and each independently linked to a carbon atom of the aliphatic backbone through an organic linking group;
 - ii) an aliphatic moiety; and
 - iii) a linking group which links the fluorochemical oligomeric portion to the aliphatic moiety;
- b) an agent to impart gloss; and
- c) water.

Claim 2 (Original): The composition according to claim 1, wherein the fluorochemical compound is an alkylated fluorochemical oligomeric compound comprising:

- a) a fluorochemical oligomeric portion comprising an aliphatic backbone with a plurality of fluoroaliphatic groups attached thereto, each fluoroaliphatic group having a fully fluorinated terminal group and each independently linked to a carbon atom of the aliphatic backbone through an organic linking group;
- b) an aliphatic moiety; and
- c) a linking group which links the fluorochemical oligomeric portion to the aliphatic moiety.

Claim 3 (Original): The composition according to claim 1, wherein the fluorochemical compound is a fluorochemical acrylate polymer or a fluorochemical urethane.

Claim 4 (Original): The composition according to claim 1, wherein the agent to impart gloss is selected from the group consisting of polyacrylates, polyurethanes, silicones, waxes, paraffin and paraffin/mineral oil blends.

Claim 5 (Original): The composition according to claim 4, wherein the agent to impart gloss is a natural wax.

Claim 6 (Original): The composition according to claim 5, wherein the natural wax is selected from the group consisting of carnauba waxes and montan waxes.

Claim 7 (Original): The composition according to claim 1, wherein the components are toxicologically acceptable.

Claim 8 (Original): The composition according to claim 1, wherein the composition comprises:

- a) from about 1 to about 30% by weight of the fluorochemical compound;
- b) from about 1 to about 30% by weight of the agent to impart gloss; and
- c) the remainder up to 100% by weight water.

Claim 9 (Original): The composition according to claim 1, additionally comprising an agent enhancing penetration of the composition into a substrate.

Claim 10 (Original): The composition according to claim 9, wherein the agent enhancing penetration of the composition into a substrate is selected from the group consisting of alkyl ethers of propylene and dipropylene glycols.

Claim 11 (Original): The composition according to claim 9, wherein the agent enhancing penetration of the composition into a substrate is selected from the group consisting of dipropylene glycol methyl ether, propylene glycol and fluoroaliphatic polymeric esters.

Claim 12 (Original): The composition according to claim 9, wherein the agent enhancing penetration of the composition into a substrate is present in an amount of about 1 to about 30% by weight.

Claim 13 (Original): The composition according to claim 1 additionally comprising a biocide.

Claim 14 (Original): The composition according to claim 13, wherein the biocide is selected from the group consisting of benzalkonium chloride, citric acid, methyl paraben, anionic and non-ionic preservatives.

Claim 15 (Original): The composition according to claim 13, wherein the biocide is present in an amount of about 0.05 to about 3% by weight.

Claim 16 (Original): The composition according to claim 1, additionally comprising a surfactant.

Claim 17 (Original): The composition according to claim 16, wherein the surfactant is selected from the group consisting of sorbitan monooleates and polyethyleneoxide sorbitan monooleates.

Claim 18 (Original): The composition according to claim 16, wherein the surfactant is present in an amount of about 0.05 to about 5% by weight.

Claim 19 (Original): A composition according to claim 1 comprising:

- a) from about 5 to about 20% by weight of a fluorochemical acrylate polymer;
- b) from about 2 to about 15% by weight of carnauba and/or montan wax;
- c) from about 2 to about 15% by weight of dipropylene glycol methyl ether;
- d) from about 0.1 to about 1.0% by weight of benzalkonium chloride; and
- e) from about 49.0 to about 91.9% by weight of water.

Claim 20 (Original): A wipe containing a composition according to claim 1.

Claim 21 (Original): A wipe according to claim 20, wherein the wipe comprises fabric or sponge.

Claim 22 (Original): A wipe according to claim 21, wherein the fabric is a non-woven fabric.

Claim 23 (Original): A wipe according to claim 20, wherein the amount of the composition in the wipe is in the range of about 100 to about 200% of the weight of the wipe.

Claim 24 (Original): A method of using the composition of claim 1 for cleaning, protecting and imparting gloss to a substrate.

Claim 25 (Original): A method of using the wipe of claim 20 for cleaning, protecting and imparting gloss to a substrate.

Claim 26 (Original): The method according to claim 24, wherein the substrate is natural or artificial leather.

Claim 27 (Original): The method according to claim 25, wherein the substrate is natural or artificial leather.

Claim 28 (Original): A method of treating a substrate by contacting the substrate with a composition according to claim 1.

Claim 29 (Original): A method of treating a substrate by contacting the substrate with a wipe of claim 20.

Claim 30 (Original): The method of claim 28, wherein the substrate is natural or artificial leather.

Claim 31 (Original): The method of claim 29, wherein the substrate is natural or artificial leather.
